

MORE FROM WOOD.

Egger Protect

Get more from your structural floor

Part of the EGGER
ADVANCED
Structural Flooring System

Product Description

EGGER Protect is made from EGGER P5 flooring grade chipboard with a durable, anti-slip, weather resistant surface layer. This surface is bonded to both sides of the board, resulting in a product that offers protection from moisture ingress, not just during construction, but for the life of the floor.

- Can be fitted in light rain conditions, minimising weather-related stoppages and enabling faster completions
- Once fully fitted, can be exposed for up to **60 days**
- Unique anti-slip surface, even in wet conditions, contributes to site safety
- Fully sealed surface protects against water and moisture ingress
- Boards can be easily scraped and washed to give a clean, professional look prior to handover
- Ideal for use with underfloor heating
- The only board we recommend tiling directly onto
- No joint sealing tape required if using EGGER Joint & Joist Adhesive

Product Information	
Size	2400 x 600 mm
Weight	1.5 tonnes
Board thickness	18 mm, 22 mm
Boards per pack	80, 64

When used as part of the EGGER Advanced Structural Flooring System, EGGER Protect is covered by our EGGER Advanced Lifetime Guarantee (See reverse).

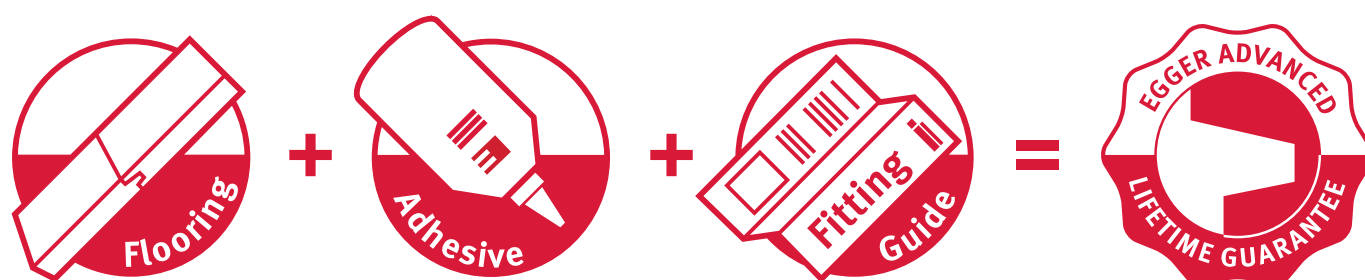

Technical specification (in accordance with EN 312)

General requirement	Test method	Unit	Specification
