ARC FOAM GUN CLEANER

DESCRIPTION

Gun & Foam Cleaner is a ready to use cleaning aerosol for use with Arc Foams and Foam Guns.

USES

- Cleaning of the gun
- Cleaning of the valves of the PU Foam Aerosol
- Removal of uncured foam

CHARACTERISTICS

- Used in conjunction with Arc Foam Gun and the foam applicator as cleaning fluid
- Contains solvents
- Can be used with normal cans due to the attachable spray nozzle

APPLICATION METHOD

AEROSOL SPRAY: With the aerosol canister in the upright position, first remove the transit cap from the top of the can. Separate the spray nozzle from the side of the can carefully keeping the opposite retaining connection intact. At arm's length secure the nozzle to the valve ensuring the spray head is facing away from you. Hold the can inverted and push down onto the spray nozzle to operate the aerosol. Direct the spray only on to areas that require cleaning. Once finished, remove the spray nozzle and replace the transit cap for safe storage.

GUN APPLICATOR: First, ensure all traces of foam residue is dissolved completely from around the gun valve area using the spray method above. Remove the spray nozzle. With the gun pointing away from the body, turn the gun applicator up side down and at arm's length, screw the upright canister onto the inverted gun applicator. Do not over tighten as this will break the integral sealing valve. Press the trigger to flush the solvent through the gun for at least 5 seconds, ensuring the gun outlet tip is thoroughly cleaned. To disconnect, place the canister upright at arm's length with the gun pointing away from the body, unscrew the canister whilst pressing the trigger to ensure there is no build-up of the aerosol gas.

LIMITATIONS

For uncured PU foam only. Do not attempt to clean gun applicators that are blocked with cured PU foam. Design for use on the majority of PU foam guns applicators. User to ensure the item to be cleaned is compatible with this product.
