

# KEEP DRY

In order to keep the stock in the best condition for sale and longevity, please following these instructions for the storage of **HD Deck**.

**Delivery**

We suggest two ratchet straps per pack for stable delivery and prevent sliding/movement in transit.

**Full pack, banded and wrapped with outer layer**

All pallet bearers must be aligned vertically. Outer layer must remain intact and interior of packs must remain dry.

**Max stack - 6 pallets high**

HD Deck should be stacked no higher than 6 on original pallets.

**Opened packs**

Must always be stored under cover on the original pallet. Product must be kept dry and in shade at all times while in storage.

**Accessories**

Accessories must be stored inside and undercover to keep dry. Fascia and trims to be stored flat on a pallet or flat surface.

**DO NOT store outside**

**DO NOT remove from pallet**
