**Recommended Monitoring procedures**

If this product contains ingredients with exposure limits then personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation, control procedure and/or the necessity to use respiratory protective equipment. Reference should be made to European Standard EN689 for methods for the assessment of exposure by inhalation to chemical agents. National guidance documents should be consulted for methods for the determination of hazardous substances.

**8.2. Exposure Controls**

**Occupational Exposure Controls**

**Technical Measures**

Ensure adequate ventilation to maintain below occupational exposure limits. If operations generate dust, fumes, gas, vapours or mist use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits.

**Personal Protection Limits**

**Respiratory Protection**

The use of suitable approved dust masks is recommended and should always be used where exposure is likely to exceed any specified exposure limits.

<b>Hand Protection</b>	Wear protective gloves to prevent soiling. Barrier cream can be used before handling this product. Hands and exposed skin should be washed with mild soap and water.
<b>Eye Protection</b>	Safety eyewear, complying with an approved standard, should be used where a risk assessment indicates this is necessary to avoid splashes, mists, gases or dusts. If operating conditions cause high dust concentrations to be created use dust goggles.
<b>Skin Protection</b>	Protective equipment should be selected based on the tasks involved and the risk assessment of the process and should be approved by a specialist. Clothing should be changed daily and not allowed to leave the workplace.
<b>Hygiene Measures</b>	Handle in accordance with good industrial hygiene and safety practices. Wash hands, forearms and face after handling chemical products, before eating smoking or using the lavatory and shower at the end of each working day. Contaminated clothing should be washed prior to re-use. Eyewash stations and emergency showers should be available close to the working location.
<b><u>Environmental Exposure Control- Technical Measures</u></b>	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases fume scrubbers, filters or engineered modifications to the process equipment will be necessary to reduce emissions to an acceptable level.
